WSWS Joins Forces with Fleetwood Electronics to Optimise Mobile Communications Solutions

Woking based Whitespace Waste Software Ltd (WSWS) is teaming up with Fleetwood Electronics Ltd to develop their mobile communications software for their Waste Management Power Depot product suite.

The joint venture will enable WSWS to further develop the Power Suite product range for PDA's alongside Fleetwood's established Bluesphere software and hardware.

Of the venture, Phil Garvey, Managing Director at WSWS says "I am delighted with this agreement. We are always looking at ways to enhance our products and teaming up with Fleetwood will enable us to take our Power Suite products to the next stage in our development plan. Mobile communications will enable even greater efficiency for our users."

About Fleetwood Electronics Ltd

Fleetwood Electronics provides mobile communications solutions allowing businesses to manage their remote events, transactions and resources in real time, offering a complete solution which includes both the software and the hardware.

Fleetwood operates within the Waste Management, Road Haulage and Facilities Management sectors to name but a few.

Fleetwood Electronics is based in Cambridge with regional offices in London and the Midlands.
