# Whitespace Waste Software Limited (WSWS) Announces the Implementation of a new Trade Waste Management system for Perth and Kinross Council

Whitespace Waste Software Limited (WSWS) is pleased to announce that they have been awarded the contract to provide Perth and Kinross Council with a new Trade Waste Management system. The contract covers the supply of a new Commercial Waste Database and application to support Depot Operations and Administration for:

- General Waste
- Paper Recycling
- Green Waste Recycling
- Glass Recycling
- Cardboard Recycling
- Polythene Recycling
- Animal By-Products
- Inert

The new system will work with the Councils FMS system, Integra to produce invoices and link to the Councils BS7666 compliant Corporate Address Gazetteer (CAG) to register properties.

Commenting on the selection process Matthew Allen, Waste Data Coordinator for the Council stated "Our evaluation process was very thorough. In the final stages we asked short listed suppliers to demonstrate how they could handle some of the more difficult transaction types. The Power Depot Suite from WSWS is installed in many other

Councils and they demonstrated to us they could provide out of the box functionality to address our requirements.”

Of the order from Perth and Kinross Council, Phil Garvey, Managing Director of WSWS states “I am delighted that this latest order further solidifies our position as the major supplier of waste management software to Councils in Scotland.”
