# Ryedale District Council Drives Waste Operations Forward Using Power Suite

After a comprehensive tender process, Ryedale District Council has placed an order for Power Suite, the Environmental Services Software solution from Woking based firm Whitespace Waste Software Limited.

Power Suite will cover the majority of the departments' operations including waste management and recycling, street and environmental cleansing, grounds maintenance and public conveniences. As part of the installation Whitespace Waste Software will assist in the integration with the Council's corporate systems including the customer contact centre and the financial management system.

Phil Long, Commercial Services Manager for Ryedale District Council comments "We are looking for a back office IT solution to manage the large amounts of data we handle and to enable us to accurately monitor the performance of various services".

The Power Suite system will automate Ryedale's Trade and Domestic operations by managing the rounds and routing along with collections, and work instructions sheets for all scheduled and ad hoc work. Whilst streamlining administrative processes and creating a more efficient workplace, the Power Suite software solution is capable of handling invoicing for Trade Customers, Duty of Care Documentation and Reporting.

## Press Information

“As well as a product, we are looking for a company who understands our problems and is willing to operate as a long term Partner”, added Phil Long. “We believe we have found such a Partner in Whitespace”.

Phil Garvey, Managing Director of Whitespace Waste Software commented, “I am delighted that Ryedale District Council has joined the ever growing list of Councils using our Power Suite Software solutions. The environmental services sector is a very exciting area and we are delighted to be regarded as the clear market leader.”

## Press Information

### **Notes to Editors**

Whitespace Waste Software Limited is built on over 18 years experience and is the leader in providing waste management software to Councils and Private Contractors across the UK and Ireland.

The Power Suite is a single fully integrated application suite that can potentially handle all of a Council's Environmental Services operational requirements, including:

- Domestic Operations
- Street Cleaning and Grounds Maintenance
- Trade Operations
- Rounds Threshold Planning
- On Board Weighing
- Power Reporting
- WasteDataFlow
