# Salisbury District Council Drives Recycling Forward Using The Power Suite from WSWS.

Salisbury District Council has placed an order for the Power Suite of products, the Environmental Services Software solution from Woking based firm Whitespace Waste Software Ltd (WSWS) for both its Domestic and Trade Operations.

Bob Chequer, Waste Management Officer for Salisbury District Council comments “Whilst we already recycle 22% of wastes collected, our aim is to increase this figure to over 30% by introducing an alternate weekly wheeled bin collection. With this in mind, we realised our current system just wasn’t up to the job, which is what lead to our decision to invest in a new waste management system and ultimately choosing WSWS’s Power Suite solution.”

The solution will automate Salisbury’s Trade and Domestic operations by managing the rounds and routing along with collections. Power Worksheets will provide instruction sheets for both scheduled and ad hoc work. The Power Depot package will also handle invoicing for trade customers, duty of care documentation and reporting all whilst reducing administrative overheads and creating a more efficient workplace.

“To run an efficient Waste Management operation you have to implement an effective Waste Management System, and we’ve found that in Power Suite.”

## Press Information

states Alex Howie, Information Systems Officer for Environmental Services at the Council.

“We needed to find a software solution that would fit our current needs and one we felt would adapt to future requirements so we can achieve our recycling and waste reduction targets as well as meet with new legislative changes. We are very confident that this is something WSWS and the Power Suite solution will enable us to do,” finishes Alex.

### **Notes to Editors**

Whitespace Waste Software Ltd is built on over 18 years experience and are the leading suppliers of waste management software to Councils and their Private Contractors in the UK and Ireland, providing a software solution to manage all services based out of the depot.

The Whitespace solution provides a single fully integrated application suite that can potentially handle all of the Council’s Environmental Services operational requirements, including:

- Trade and Domestic Operations
- Street Cleaning and Grounds Maintenance
- Power Reporting
- WasteDataFlow
- On Board Weighing
- Rounds Threshold Planning
